

CICADA AUTONOM PUMP SET

FLEXIBILITY FIRST

The CICADA AUTONOM system is basically an enhancement of the CICADA EXTENSION system: it acts as a substitute for a relay extension board and allows you to control the pump set with a broad set of high and low voltages.

CICADA AUTONOM

A VAST VARIETY OF VOLTAGES

The CICADA AUTONOM system consists of 6 pumps. The system can be used with a broad range of voltages taken from the washer to activate the pump set.

The pumps are powered by a low voltage taken from an inner power supply unit.

Спецификации

- **Power supply:** 220V AC 50 Hz
- **Pump power supply:** 12V DC (provided by an inner power supply unit)
 - **Input voltage:** 12-24V AC/DC or 120-220V AC
 - **Flow rate** 1200-1500 mL/min
 - **Size (with suspension):** 450 x 510 x 150 mm
 - Can support 2 additional devices
 - **6 activation buttons** for easy pump calibration
 - Removable front panel with fixation
 - Connection diagram (to a programmable washer)
