

# CICADA EXTENSION PUMP SET

## A UNIVERSAL SOLUTION

The CICADA EXTENSION set was originally created to accompany the SIX PACK control system, but it can also be compatible with various other control systems and can easily be connected to relay extension boards of programmable washing machines.

## SMALL BUT FEISTY

The CICADA EXTENSION set contains 6 pumps. It's a cost-efficient alternative to many pump sets on the market.

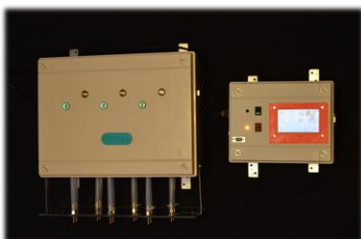

The pumps are activated by a low voltage taken from an inner power supply unit.

## Specifications

- **Power supply:** 220V AC 50 Hz
- **Pump power supply:** 12V DC (provided by an inner power supply unit)
- **Flow rate:** 1200-1500 mL/min
- **Size (with suspension):** 450 x 510 x 150 mm
- Additional **12 V** output available for connection of one extra **1 Amp** device (such as a flush valve)
- **6 activation buttons** for easy pump calibration
- Removable front panel with fixation
- Connection diagram (to a programmable washer)
