

SIX-PACK DISPENSATION SYSTEM

CONVENIENCE IN EVERY DETAIL

The SIX-PACK touch display lets you edit programs and pump parameters, as well as view pump operation statistics on the spot.

The main advantage: the SIX-PACK system can easily be connected to ***pump sets and washers of all brands.***

The SIX-PACK system

A SYSTEM WITH AN ATTITUDE

Meet the innovative, independent, programmable **SIX-PACK** liquid soap dispensation system! Boasting a vibrant display with an intuitive interface, this powerful module offers more functionality than any system on the market!

A one-of-a-kind device

- Can be hooked up to any washer
- The system is programmed independently and doesn't depend on the washer's controller
 - 6 modes of operation + a diagnostics mode
 - Stores almost up to 60 dispensation tasks, which can be split into 3 groups and combined into programs
 - Collects statistics on each connected pump
 - Password protection for pump rental organizations
 - Displays program parameters in real-time
 - Lets you interfere with running programs
 - Supports a manifold connection
 - Program and pump parameters are editable: soap capacities, pump activation delays, pump productivity values
- Can synchronize itself with the washer's controller
- Can be remotely controlled
- Connects to a PC for software updates and data exchange

COMPLETE COMPUTERIZATION

Download a modern Windows 10 editor and create and edit sets of programs, which can then be uploaded to your **SIX-PACK** module via a USB connection.

Existing programs and parameters can also be downloaded from a **SIX-PACK** module to your PC for modification.

The program files you create are stored on your PC and can be freely moved around and copied to any **SIX-PACK** module.

All of these editing options are also directly available on the **SIX-PACK** module, letting you apply any quick changes without the need to connect to a PC!

During development, a lot of careful consideration was given to the design of the software in order to make it as easy to understand and use as possible.

IT'S ALL THAT SIMPLE!

On programmable machines: connect any 2 washer pump control signals to the **SIX-PACK** module

On non-programmable machines: connect the inlet and drain valve signals to the **SIX-PACK** module

LEAVE THE REST TO SIX-PACK!
